- access to knowledge, partners and markets
- facilitating innovation in the food sector
- supporting knowledge sharing and cooperation
- creating visibility for members national and international

## Food Processing Initiative e.V.

Networking, clustering and co-operation on foods:

*"Your pipeline for innovation, technology research,  
product and process optimization"*

### Mission

Our mission is to facilitate innovation through branding and cooperation in the whole food value chain, supporting the visibility and growth of members. As a member driven organization, FPI e.V. will support members' operational cooperation priorities with regard to dissemination of knowledge, innovation support, co-ordination and international profiling.

We aim at:

- strengthening competitiveness of companies on tomorrows markets
- fostering co-operation between the partners on the market (b2b / b2s)
- facilitate the dialogue with political decision makers
- improving the perception of the competences and needs of our companies

### Network

By regular exchange of news and views, intensive collaboration and shared activities, we successfully develop the sector's inherent potentials. Our network offers trusted contacts, stimulates dialogue and impulses for innovation and allows resource sharing. FPI e.V. members get:

- networking opportunities with established and innovative businesses and organisations in the food sector
- increased visibility through events, website and fairs
- access to international conferences, meetings and network activities - often at reduced costs
