

Lebensmittel 4.0

Digitization affects many areas of life, including the way of manufacturing products. Because the food industry faces unique challenges, the team of Lebensmittel 4.0 offers help in finding expert insight on the trends, tools and technologies that take change in food production to optimize processes.

The project focuses on the future-oriented implementation of digital transformation processes from food processing to the consumer. The aim is to identify and evaluate the digitalization potential for your company.

Digitization potential of processes in the food industry:

- ✓ real-time quality control
- ✓ intelligent hygiene management
- ✓ individualized foods
- ✓ flexible production

Let us take the step into your digital tomorrow together.

We offer:

- ✓ knowledge transfer in the form of specialist forums and dialogue events
- ✓ support in discovering your 4.0 potentials
- ✓ development assistance for the implementation of your 4.0 ideas
- ✓ future through education and training courses for experts

Project duration: 01.01.2016 – 31.12.2018

Lebensmittel 4.0 is part of the integrated action concept "OWL 4.0 – Industrie, Arbeit, Gesellschaft". Within this framework of 10 projects, the potentials of digital transformation for strengthening the economy and society are being exploited.
